

## David Tucker

### Profile

I am a tall, Scotch-Irish male from the Bay Area looking to pursue interests in Computer Science and other technologies as well as active, physical work in the great outdoors.

### Experience

#### WEB DEVELOPER, BAYFITTED, SAN FRANCISCO, CA. — 2009-PRESENT

The first site I built ([www.bayfitted.com](http://www.bayfitted.com)) was for Bayfitted, a custom clothing store in S.F.. It is fully featured with many custom graphics, Facebook & Flickr integration, user accounts, Paypal e-commerce, and a mobile site optimized for iPhone and Android users! This is an ongoing project.

#### WEB DEVELOPER, SAROOR INDIAN CUISINE, WALNUT CREEK, CA. — 2010-PRESENT

One of my simpler projects, [www.saroorindiancuisine.net](http://www.saroorindiancuisine.net) is very basic, but uses powerful applications of JavaScript and CSS as well as standard error-handling and mobile device optimization. Though the site is finished, I continue to maintain and update it as necessary.

#### WEB DEVELOPER, AUSTIN TAILOR CLOTHING & CO., DANVILLE, CA. — 2010-PRESENT

By far my largest project to date, [www.austintailor.com](http://www.austintailor.com) uses SSL, merchant services from Authorize.net, a custom built cart & transaction management system, and user accounts. This site will hopefully be launched on Feb. 25. Until then, it is still being tested.

#### CAMP COUNSELOR, CAMP CONCORD, SOUTH LAKE TAHOE, CA. — 2009-2010

I have attended Camp Concord since I was 8. Two years ago I worked there as a Junior Staff which entailed washing dishes, serving food, cleaning bathrooms, bussing tables, and assisting counselors in the cabins. Last year I was a full counselor which required leadership abilities and enthusiasm as we took ten 8-16 year-old kids rafting, canoeing, hiking, and more. I intend to return if possible.

#### LIFEGUARD, PLEASANT HILL AQUATIC PARK, PLEASANT HILL, CA. — 2008-2010

My first job entailed daily lifeguarding and giving children private swim lessons. After my first summer, I began off-season and custodial work guarding a team in training for a triathlon and cleaning locker rooms each night. Weekly trainings were mandatory and tested our knowledge of our training.

### Education

De La Salle High School, Concord, CA. — Diploma (Graduated with High Honors), 2010

University of California, Santa Cruz, CA. — Expected B.A./B.S. in Computer Science, 2014

### Skills

I am experienced in the use of both Windows and Mac OS X. I can read and write in HTML 5, CSS 3, PHP, TI-Basic, C, Java; basic JavaScript, XML, and AppleScript; and elementary Unix and SQL. All sites in my portfolio were custom coded by myself. I can use Photoshop and administer computer systems and networks. I have built a computer on my own before and am mostly self-taught in the methods of Computer Science. I am still a qualified lifeguard trained in C.P.R., first aid, emergency oxygen administration, and A.E.D. use as well as C.P.R. assistive tools such as breathing barriers and bag-valve masks. I am a certified recreational open water Scuba diver and have significant experience in the water. I also know basic Spanish.
